

利用Web of Science进行创新性科学研究

李琛

中国科学技术大学图书馆

目录

CONTENTS

1. 数据与资源：Web of Science简介

2. Web of Science检索技巧

3. Web of Science在科研选题与投稿选刊中的应用

- 如何洞悉本领域的研究前沿与热点助力科研选题？
- 如何高效利用课题研究相关的文献？
- 如何高效开展课题调研？
- 如何高效管理文献资源，规范引用参考文献？
- 如何选择合适的期刊发表学术成果？

4. Web of Science平台其他资源与工具

1. 数据与资源：Web of Science简介

科研的基本工作流程

- 检索相关研究 分析现有研究结果 发现问题 提出假说
- 制定实验方案 定义实验步骤 试验 资料汇总
- 数据可视化 数据验证 调整试验 验证假说
- 撰写研究论文 发表论文

科研中的信息需求

- 据美国科学基金会（National Science Foundation, NSF）统计，一个科研人员花费在查找和消化科技资料上的时间需占全部科研时间的51%，计划思考占8%，实验研究占32%，书面总结占9%。
- 由上述统计数字可以看出，科研人员花费在科技出版物上的时间为全部科研时间的**60%**。

为什么要使用专业数据库?

“Google can bring you back 100,000 answers, a librarian can bring you back the right one.”

——Neil Gaiman

常见文献数据库的两大类型

查找**相关文献**是科研工作的重要内容，除了利用**科学搜索引擎**之外，欢迎使用各**专业数据库**。

全文数据库

- 原始文章（一次文献）
- 收录有限
- 直接获取

文摘索引库

- 二次加工（二次文献）
- 收录较广
- 另外获取

因其强大的检索、分析功能，更适用于文献调研

Web of Science综合性的学术平台

Web of Science核心合集数据简介

期刊

- ❖ Science Citation Index Expanded (科学引文索引)
178个学科的9,500多种高质量学术期刊
- ❖ Social Sciences Citation Index (社会科学引文索引)
58个社会科学学科的3,500多种权威学术期刊
- ❖ Arts & Humanities Citation Index (艺术与人文引文索引)
28个人文艺术领域学科的1800多种国际性的学术期刊
- ❖ Emerging Sources Citation Index (新兴资源引文索引)
254个学科的7700多种国际性学术期刊

会议

- ❖ Conference Proceedings Citation Index – Science+ Social Science & Humanities(会议录引文索引- 自然科学版+社会科学及人文版)
超过225,000个会议录，涉及250多个学科

化学

- ❖ IC/CCR (化学类数据库)
超过125万种化学反应信息及655万种化合物

Preprint Citation Index

PCI, 预印本引文索引

来自全球几大主流预印本平台的200多万预印本论文的集合: arXiv, bioRxiv, medRxiv, ChemRxiv和Preprints.org

- ✓ 一站式快速定位最新研究进展
- ✓ 评估预印本论文的质量
- ✓ 追踪研究想法的演变

ProQuest Dissertations & Theses Citation Index

PQDT Citation Index, PQDT博硕士论文引文索引

ProQuest Dissertations & Theses Global

Web of Science

探索来自ProQuest dissertation & Theses Global的550万+学位论文元数据记录

来自全球60多个国家的4000+大学的学位论文

对于PQDT Global用户，可以链接到300万+ 学位论文全文

Web of Science核心合集数据简介

- ❖ 遴选全球最具学术影响力的高质量期刊
- ❖ 完整收录每一篇文章的全部信息，包括全面的**引文信息**

- 基于早期的期刊、报告、出版物来定位当前研究；
- 追溯某一观点从首次提出至今的历史脉络与方法论；
- 进行更深入、更全面的检索，并跟踪百年的研究发展趋势。

引文索引

Dr. Eugene Garfield
Founder & Chairman Emeritus
ISI, Thomson Scientific

Dr. Garfield 1955年在 Science 发表论文提出将引文索引作为一种新的文献检索与分类工具：将一篇文献作为检索字段，从而跟踪一个Idea的发展过程及学科之间的交叉渗透的关系。

Citation Indexes for Science

A New Dimension in Documentation
through Association of Ideas

Eugene Garfield

"The uncritical citation of disputed data by a writer, whether it be deliberate or not, is a serious matter. Of course, knowingly propagandizing unsubstantiated claims is particularly abhorrent, but just as many naive students may be swayed by unfounded assertions presented by a writer who is unaware of the criticisms. Buried in scholarly journals, critical notes are increasingly likely to be overlooked with the passage of time, while the studies to which they pertain, having been reported more widely, are discovered through the

approach to subject control of the literature of science. By virtue of its different construction, it tends to bring together material that would never be collated by the usual subject indexing. It is best described as an association-of-ideas index, and it gives the reader as much leeway as he requires. Suggestiveness through association-of-ideas is offered by conventional subject indexes but only within the limits of a particular subject heading.

If one considers the book as the macro unit of thought and the periodical article

引文索引

关键词的不断演变，造成漏检，
错过高影响力的重要文献
从一篇高质量的文献出发，沿
着科学研究的发展道路前行

引文索引的意义

引文索引系统打破了传统的学科分类界限，既能揭示某一学科的继承与发展关系，又能反映学科之间的交叉渗透的关系

学科上的相关性

- 理论与方法：借鉴与利用
- 技术与手段：应用与发展

横向上的对应性

- 实验或方法：互相参照与借鉴
- 结果与讨论：比较与应用

纵向上的继承性

- 课题的基础与起源
- 发展与进步
- 反引：学术争鸣

On Hold

Concerns have been raised about the quality of the content published in this journal. The journal is being re-evaluated according to our selection criteria; new content will not be indexed during the course of the re-evaluation.

When the evaluation is complete, the publisher will be informed of the outcome and the journal will either:

- be removed from coverage if it no longer meets the quality criteria
- or remain covered if it continues to meet the quality criteria.

If the journal meets the quality criteria, any missing content will be indexed. If the journal is removed from coverage, content will not be backfilled. In the most serious cases of breaches in a journal's editorial standards, as determined by our selection criteria, published content may be removed from Web of Science. Timeframes for completing a re-evaluation will depend on the particular circumstances of each case.

2. Web of Science检索技巧

巧用运算符/通配符

运算符（英文）	检索结果	检索式	作用
" "	aquatic ecosystem	"aquatic ecosystem"	精确检索短语
*	gene, genetics, generation等	gene*	代表≥0个字符
?	women;woman等	wom?n	代表1个字符
\$	color,colour等	colo\$r	代表0或1个字符

文献检索新功能

(1) 检索字段说明与新增

在新版Wos中，选择一个检索字段，平台会给出**该字段的检索说明与实际举例**，方便大家操作；同时新增了出版商检索字段，部分检索字段可以更灵活自定义，比如**出版日期和索引日期均可以精确到年月日**。

文献检索新功能

(2) 所属机构字段新增联想功能

选择“所属机构”检索字段，平台将根据输入内容推荐提示归并后的机构名称，并支持从索引中搜索和添加。

文献检索新功能

(3) 支持一串DOI、入藏号、PubMed ID智能检索

新版WoS支持一串DOI、入藏号、PubMed ID检索，中间无需使用布尔逻辑运算符连接，即默认为OR运算。

AI关键词智能推荐，查全查准两不误

Environmental Kuznets Curve hypothesis: A survey

Dinda, S

Aug 1 2004 | ECOLOGICAL ECONOMICS 49 (4) , pp.431-455

The Environmental Kuznets Curve (EKC) hypothesis postulates an inverted-U-shaped relationship between different pollutants and per capita income, i.e., environmental pressure increases up to a certain level as income goes up; after that, it decreases. An EKC actually reveals how a technically specified measurement of environmental quality changes as the fortunes of a country change. A sizeable ... 显示更多

H指数 (h-index)

- H指数 (H index) 是一个混合量化指标，可用于评估研究人员的学术产出数量与学术产出水平。H指数是2005年由美国加州大学圣地亚哥分校的物理学家乔治·赫希提出的。
- H指数的计算基于其研究者的论文数量及其论文被引用的次数。赫希认为：**一个人在其所有学术文章中有N篇论文分别被引用了至少N次，他的H指数就是N。**

What's wrong with the h-index, according to its inventor

"Severe unintended negative consequences."

24 March 2020

Gemma Conroy

h指数的提出者——美国物理学家乔治·赫希 (Jorge E Hirsch) 在2020年1月的《物理学与社会》上“自曝家丑”，指出了h指数存在的诸多不足。比如，可能阻碍科研人员的创新性思考、鼓励大家追逐热门研究主题，且不同领域的h指数几乎没有可比性。

Hirsch写道：“科学界中大约有一半人喜欢h指数，而另一半则讨厌它。”

虽然他仍认为这是评价科学成就的最佳指标之一，但也担心“h指数可能会失败，并产生意想不到的严重负面后果”。

Flame propagation through zirconium particles coated with different ratios of Fe₃O₄

作者: Gao, W (Gao, Wei)^[1]; Zhou, Q (Zhou, Qi)^[2]; Sun, JH (Sun, Jinhua)^[2]

FUEL

卷: 148 页: 231-237

DOI: 10.1016/j.fuel.2015.01.082

出版年: MAY 15 2015

查看期刊信息

摘要

This study investigated the effects of Fe₃O₄ coating ratios on the characteristics of flame propagation in dust clouds of 38-μm zirconium particles. A high-speed observation system, fine thermocouples, scanning electron microscopy and X-ray photoelectron spectroscopy were used to reveal the flame propagation behaviors, velocities, temperatures and reaction mechanisms in detail. The results showed that the propagating flames emitted a strong white light, with a thin yellow light zone gradually appearing in front of the white light zone. As the concentration was increased, the flame propagation velocities of zirconium particles coated with an Fe₃O₄ ratio of 9:1 were greater than those of zirconium particles coated with an Fe₃O₄ ratio of 3:1 due to the zirconium content and the contact area between zirconium particles and the oxygen. The temperatures of zirconium particles coated with an Fe₃O₄ ratio of 9:1 and zirconium particles coated with an Fe₃O₄ ratio of 3:1 did not peak in the experimental range. But the temperatures of zirconium particles coated with an Fe₃O₄ ratio of 9:1 were always higher than those of zirconium particles coated with an Fe₃O₄ ratio of 3:1. The scanning electron microscopy and X-ray photoelectron spectroscopy demonstrated that a replacement reaction occurred between Zr and Fe₃O₄ during the combustion process. (C) 2015 Elsevier Ltd. 被引参考文献检索 (Cited Reference Search)

以一篇文章（无论是否SCI论文）、一个作者、一本期刊、一个专利或者一本书作为检索词,进行被引文献的检索。

在不了解关键词或者难于限定关键词的时候，可以从一篇高质量的文献出发，了解课题的全貌跟踪最新的发展，设计下一步的研究计划。

- 某一理论有没有得到进一步的证实？是否已经应用到了新的领域？
- 某项研究的最新进展及其延伸？
- 某个实验方法是否得到改进？
- 如何了解某篇论文/某部论著被引用情况，揭示其影响力？

例3：检索《时间简史》被引情况

通过被引参考文献检索了解霍金的著作《时间简史》

- 对于该书有哪些不同的视角和观点？
- 其他物理学家沿着他的方法分析提出了哪些理论？
- 最近5年的最新发展与应用是什么？

例3：检索《时间简史》被引情况

The screenshot shows a database search interface with two tabs: 'DOCUMENTS' and 'CITED REFERENCES'. The 'CITED REFERENCES' tab is selected and highlighted with a yellow box. Below the tabs, there is a search criteria table with three rows, also highlighted with a yellow box. The first row has 'Cited Author' as the field and 'hawking s*' as the value. The second row has 'And' as the operator, 'Cited Work' as the field, and 'brief hist time' as the value. The third row has 'And' as the operator, 'Cited Year(s)' as the field, and '1988' as the value. To the right of each row is a delete button (X). Below the table are two buttons: '+ Add row' and '+ Add date range'. At the bottom right are two buttons: 'X Clear' and 'Search'.

Operator	Field	Value	Action
	Cited Author	hawking s*	X
And	Cited Work	brief hist time	AZ X
And	Cited Year(s)	1988	X

+ Add row + Add date range

X Clear Search

录入信息时需注意作者姓名缩写情况
通常姓是全拼，名是首字母缩写，姓在前，名在后。

例3：检索《时间简史》被引情况

Web of Science在科研选题与投稿选刊中的应用

- 如何洞悉本领域的研究前沿与热点助力科研选题?
- 如何高效利用课题研究相关的文献?
- 如何高效管理文献资源, 规范引用参考文献?
- 如何选择合适的期刊发表学术成果?

科研选题的方法与思路

如何洞悉本领域的研究前沿与热点助力科研选题？

- 1、ESI研究前沿 (Research Fronts)
- 2、研究前沿报告

基本科学指标数据库ESI

Essential Science Indicators (ESI)：基本科学指标数据库，是衡量科学研究绩效、跟踪科学发展趋势的分析评价工具。

- 来自于 Web of Science 的10年滚动数据，基于22个学科；
- 总影响力（总引用次数）进入全球前1%的**科学家、研究机构**（或大学）排名；
进入全球前50%的**国家**（或地区）及**学术期刊**排名
- **高被引论文Highly Cited Paper**
过去10年中所发表的，在统计时间点，被引次数在同年同学科中达到该学科的前1%
- **热点论文HOT Paper**
近两年内发表，在统计时间点，近两个月的被引次数达到该学科的前0.1%
- **研究前沿Research Fronts**
统计高被引论文之间的引证关系，采用共聚类分析得出关键词

ESI研究前沿 (Research Fronts)

- ❖ 利用co-citation analysis对高被引论文进行分析，一组高被引论文的标题中的主要关键词组成研究前沿
- ❖ 研究前沿的分析揭示了不同研究者因探究科学问题产生的关联性。

ESI Research Fronts的生成过程

如何洞悉本领域的研究前沿?

借助ESI Research Fronts把握前沿热点

查看核心论文
了解研究细节

ESI Research Fronts “分子机器” top5研究前沿

分子机器（诺贝尔讲座）；机械连锁分子机；氧化还原驱动的人造分子马达；人造分子机器；人造分子马达

可靠的基于深度学习的势能模型；下层分子机器学习模型；深层潜在分子动力学；通用量子机器学习；深度学习框架

细胞内微RNA成像；活细胞；颗粒上随机DNA WALKER；催化分子成像；熵驱动的DNA纳米机器

介孔二氧化硅纳米粒子；药物递送；大写；纳米机械

分子图卷积；分子机器学习；基准；指纹；分子网

研究前沿报告

2023年11月28日，科睿唯安与中国科学院向全球联合发布了《2023研究前沿》报告，这是双方连续第十年携手发布《研究前沿》系列报告。

《2023研究前沿》报告依托于中国科学院杰出的文献分析实力，根据科睿唯安Web of Science和Essential Science Indicators（基础科学指标，简称ESI）的高质量数据，遴选出了自然科学和社会科学的 11 个大学科领域排名最前的 110个热点前沿和 18个新兴前沿。

科研选题的方法与思路

如何高效利用课题研究相关的文献？

❖ 查找本课题相关的论文

- 如何快速获取该领域的高影响力的论文？

❖ 分析研究进展与发展趋势

- 了解某特定课题在不同学科的分布情况
- 分析某研究课题的总体发展趋势
- 了解与自己研究方向有关的科研机构
- 找到该研究课题中潜在的合作伙伴
- 密切关注该研究领域的顶尖研究小组的发表成果

研究课题：高熵合金

- 高熵合金是一种合金，一般可以被定义为由五个以上的元素组元按照等原子比或接近于等原子比合金化。它是基于20世纪90年代大块非晶合金的开发的条件下提出的。
- 已有的研究报道发现，高熵合金具有一些传统合金所无法比拟的优异性能，如高强度、高硬度、高耐磨耐腐蚀性、高热阻、高电阻等，从而成为在材料科学和凝聚态物理领域中继大块非晶之后一个新的研究热点。

Improved Wear Resistance of a Heterogeneous CoCrNi Medium-Entropy Alloy

Huang, ZB; Ren, Y; (...); Wang, HF

Dec 2022 | TRIBOLOGY LETTERS

70 (4)

被引参考文献深度分析

Medium-entropy alloys (MEAs) exhibit excellent mechanical properties. However, limited studies have been conducted to explore their cryogenic temperature wear behaviors and thus hinder their application. Here, we report a mono-phased heterogeneous CoCrNi MEA composed of fully recrystallized grains and non-recrystallized grains. The results show that the MEA exhibits excellent wear resistance at cryogenic temperature. The wear volume loss of the MEA is 1.2 × 10⁻⁴ mm³ after 1000 m wear tests at -196 °C. The MEA also exhibits excellent mechanical properties at cryogenic temperature. The tensile strength of the MEA is 1450 MPa and the elongation to fracture is 12%. The MEA also exhibits excellent thermal stability and mechanical behaviors at cryogenic temperature. The MEA is expected to be a promising material for cryogenic applications.

1 Improved Wear Resistance of a Heterogeneous CoCrNi Medium-Entropy Alloy at Cryogenic Temperature

Huang, ZB; Ren, Y; (...); Wang, HF

Dec 2022 | TRIBOLOGY LETTERS 70 (4)

被引参考文献深度分析

Medium-entropy alloys (MEAs) exhibit excellent mechanical properties and unique deformation mechanism at cryogenic temperatures. However, limited studies have been conducted to explore their cryogenic temperature wear behaviors and thus hinder their further cryogenic applications. Here, we report a mono-phased heterogeneous CoCrNi MEA composed of fully recrystallized grains and non-recrystallized grains that shows a favorable combination of strength and ductility. Meanwhile, a decreased coefficient of friction and improved wear resistance are revealed with the decreasing temperatures (0 degrees C -> -120 degrees C). The wear mechanism shows an apparent transition from brittle fracture to mild plastic deformation when temperature decreases. The enhancement of strength-ductility for heterogeneous CoCrNi MEA at lower temperature leads to a reduction of ploughing coefficient and superior plastic response, thus resulting in excellent wear resistance. The present work provides a convenient route for preparing strength-ductility balanced and wear-resistant alloys for cryogenic applications.

摘要

This paper reviews the recent research and development of high-entropy alloys (HEAs). HEAs are loosely defined as solid solution alloys that contain more than five principal elements in equal or near equal atomic percent (at.%). The concept of high entropy introduces a new path of developing advanced materials with unique properties, which cannot be achieved by the conventional micro-alloying approach based on only one dominant element. Up to date, many HEAs with promising properties have been reported, e.g., high wear-resistant HEAs, Co_{1.5}CrFeNi_{1.5}Ti and Al_{0.2}Co_{1.5}CrFeNi_{1.5}Ti alloys; high-strength body-centered-cubic (BCC) AlCoCrFeNi HEAs at room temperature, and NbMoTaV HEA at elevated temperatures. Furthermore, the general corrosion resistance of the Cu_{0.5}NiAlCoCrFeSi HEA is much better than that of the conventional 304-stainless steel. This paper first reviews HEA formation in relation to thermodynamics, kinetics, and processing. Physical, magnetic, chemical, and mechanical properties are then discussed. Great details are provided on the plastic deformation, fracture, and magnetization from the perspectives of crackling noise and Barkhausen noise measurements, and the analysis of serrations on stress-strain curves at specific strain rates or testing temperatures, as well as the serrations of the magnetization hysteresis loops. The comparison between conventional and high-entropy bulk metallic glasses is analyzed from the viewpoints of eutectic composition, dense atomic packing, and entropy of mixing. Glass forming ability and plastic properties of high-entropy bulk metallic glasses are also discussed. Modeling techniques applicable to HEAs are introduced and discussed, such as ab initio molecular dynamics simulations and CALPHAD modeling. Finally, future developments and potential new research directions for HEAs are proposed. (C) 2013 Elsevier Ltd. All rights reserved.

葉均蔚，国立清华大学材料工程学系，被誉为**高熵合金之父**，2004年5月发表的关于多成分的纳米结构高熵合金的文章，提出高熵合金的研究成果，突破材料學有史以來的最大迷思，轰动材料學界至今被引用869次。

通过引用经典文献提高揭示度

引经据典：通过引用经典文献提高揭示度

- 据Web of Science收录数据显示：目前被引用次数最高的前50篇文献，其中84%发表于20年前, 36%发表于40年前。
- 编辑与审稿专家会关注论文的参考文献，是否包含一些该领域的“奠基石”性论文，如果参考文献缺失经典论文可能被认为研究基石不稳。
- 从对参考文献的统计分析数据来看，高被引论文具有一些显著的共性：**即参考文献数量较多，且参考的论文年代都比较久远。**

1 A critical review of high entropy alloys and related concepts

Miracle, DB and Senkov, ON

Jan 1 2017 | ACTA MATERIALIA 122 , pp.448-511

High entropy alloys (HEAs) are barely 12 years old. The field has stimulated new ideas and has inspired the exploration of the vast c offered by multi-principal element alloys (MPEAs). Here we present a critical review of this field, with the intent of summarizing key major trends and providing guidance for future efforts. Major themes in this assessment inc

2 A fracture-resistant high-entropy alloy for cryogenic applications

Gludovatz, B; Hohenwarter, A; (...); Ritchie, RO

Sep 5 2014 | SCIENCE 345 (6201) , pp.1153-1158

High-entropy alloys are equiatomic, multi-element systems that can crystallize as a single phase, despite containing multiple elements with different crystal structures. A rationale for this is that the configurational entropy contribution to the total free energy in alloys with five or more major elements may stabilize the solid-solution state relative to multiphase microstructures. We examine

Catch reconstructions reveal that global marine fisheries catches are higher than reported and declining

Daniel Pauly¹ & Dirk Zeller¹

Fisheries data assembled by the Food and Agriculture Organization (FAO) suggest that global marine fisheries catches increased to 86 million tonnes in 1996, then slightly declined. Here, using a decade-long multinational 'catch reconstruction' project covering the Exclusive Economic Zones of the world's maritime countries and the High Seas from 1950 to 2010, and accounting for all fisheries, we identify catch trajectories differing considerably from the national data submitted to the FAO. We suggest that catch actually peaked at 130 million tonnes, and has been declining much more strongly since. This decline in reconstructed catches reflects declines in industrial catches and to a smaller extent declining discards,

研究课题:高熵合金

投稿选刊的方法与思路

如何高效管理文献，实现与课题组文献资源共享？

参考文献格式正确的重要性

- 参考文献格式的正确与否直接关系到我们文章投稿的成功率。
- 参考文献格式要求不尽相同：不同领域、不同期刊、不同院校的硕博士论文

在2004年投向Nature的中国文章有55%，2003年更是高达62%，未经编委审查，在期刊初审阶段就退稿，很大一部分是格式问题，特别是参考文献格式。

即使是最高水平的期刊，其中也有30%的文章有参考文献的错误，这大大降低了文章被引用次数的统计。

95

EndNote强大的文献管理功能

- 与Microsoft Word自动连接, 边写作边引用

自动生成文中和文后参考文献

提供3300多种期刊的参考文献格式

- 提高写作效率:

按拟投稿期刊的格式要求自动生成参考文献, 节约了大量的时间和精力

对文章中的引用进行增、删、改以及位置调整都会自动重新排好序

修改退稿, 准备另投它刊时, 瞬间调整参考文献格式

Retraction Alerts 撤稿提醒

- 科睿唯安与Retraction Watch（撤稿观察）合作，共享其数据库
- EndNote自动识别“已撤稿文章”，并对其标记

【撤稿观察】是BioNews旗下一档关于学术文章撤稿相关进展报道的栏目。文章通报的是国外著名撤稿网站PubPeer和Retraction Watch已经公布的确定的撤稿事实。

-
- Retraction Watch（撤稿观察）数据库中包含30,000+篇已撤回的期刊文章及会议文章摘要，数据可追溯至1970

投稿选刊的方法与思路

如何选择合适的期刊发表学术成果？

- 1、分析检索结果：出版物标题分析
- 2、Journal Citation Reports
- 3、ENDNOTE投稿期刊推荐

“高熵合金” 相关研究有哪些可以参考的投稿期刊?

借鉴同领域更多科研人员的投稿经验

发现相关的学术期刊进行投稿

- 分析备选期刊的录用倾向性
- 尤其是跨学科的领域投稿指导

“高熵合金” 相关研究期刊表现如何？

Journal Impact Factor

The Journal Impact Factor (JIF) is a journal-level metric calculated from data indexed in the Web of Science Core Collection. It should be used with careful attention to the many factors that influence citation rates, such as the volume of publication and citations characteristics of the subject area and type of journal. The Journal Impact Factor can complement expert opinion and informed peer review. In the case of academic evaluation for tenure, it is inappropriate to use a journal-level metric as a proxy measure for individual researchers, institutions, or articles. [Learn more](#)

工作原理

只要很少的一些信息, 例如标题、摘要和参考文献, 我们就可以帮您找出最适合投稿的期刊。

通过我们正在申请专利的技术, 您可以对来自 Web of Science 的数百万数据点和引文关系进行分析, 探寻这些出版物与您引文数据之间的关联。

只需要几秒钟, 系统就会为您送上 JCR® 数据、关键的期刊信息以及出版商详情, 帮助您比较各项选择并进行投稿。

只有 Clarivate Analytics 才能通过强大的 Web of Science 平台, 为您的稿件发表选择提供支持。

4. Web of Science平台其他资源与工具

Derwent Innovations Index

将 Derwent World Patent Index (1963 年至今) 中超过 50 个专利发布机构索引的高附加值专利信息与 Derwent Patents Citation Index (1973 年至今) 中索引的专利引用信息进行组配。

- 检索改写后更加清晰易懂的专利标题和摘要，并且突出了每项发明的新颖性、用途、优点和权利要求。
- 使用国际专利分类号或唯一的德温特分类代码进行精确检索。
- 将来自多个专利授权机构的专利整合到一个专利家族，以便轻松而全面地揭示每项发明。
- 通过浏览专利引用信息来监控发明的影响力。

Inspec

物理、电气/电子工程、计算、控制工程、机械工程、生产与制造工程以及信息技术领域全球期刊和会议录文献的综合性索引。

- 使用独有的 Inspec 叙词和分类号以及化学、数字和天文索引进行检索。

MEDLINE

美国 National Library of Medicine® (美国国家医学图书馆) 主要的生命科学数据库。

- 探索生物医学和生命科学、生物工程、公共卫生、临床护理及动植物科学等领域。
- 利用 MeSH 主题词和 CAS 登录号进行精确检索。
- 链接到 NCBI 数据库和 PubMed 相关文献。

摘要

This paper reviews the recent research and development of high-entropy alloys (HEAs). HEAs are composed of more than five principal elements in equal or near equal atomic percent (at.%). The concept of HEAs is to develop advanced materials with unique properties, which cannot be achieved by the conventional single element. Up to date, many HEAs with promising properties have been reported, e.g., high strength and high temperature Al_{0.2}Co_{1.5}CrFeNi_{1.5}Ti alloys; high-strength body-centered-cubic (BCC) AlCoCrFeNi HEAs at room temperature. Furthermore, the general corrosion resistance of the Cu_{0.5}NiAlCoCrFeSi HEA is much better than that of the conventional 304 stainless steel. This paper first reviews HEA formation in relation to thermodynamics, kinetics, and processing. Physical, magnetic, chemical, and mechanical properties are then discussed. Great details are provided on the plastic deformation, fracture, and magnetization from the perspectives of crackling noise and Barkhausen noise measurements, and the analysis of serrations on stress-strain curves at specific strain rates or testing temperatures, as well

Effects of heavy metal accumulation on the 96-h LC50 values in tench Tinca tinca L., 1758

Shah, SL and Altindag, A

2005 | Turkish Journal Of Veterinary & Animal Sciences

The effects of already accumulated heavy metals (Hg, Cd, Pb) in the body of tench on the 96-h LC50 values of the respective heavy metals were studied. The body concentration of mercury, cadmium and lead was 0.011, 0.32 and 1.59 mg/g respectively, and their 96-h LC50 values were 1.0, 6.5 and 300.0, ppm, respectively. The general accumulation order (... 显示更多

Title: Effects of metformin on prostatic tissue of rats with metabolic syndrome and benign prostatic hyperplasia

Author(s): Xu, CY (Xu, Congyun); Xu, Y (Xu, Yan); Shen, Z (Shen, Zhou); Zhou, HC (Zhou, Hangcheng); Xiao, J (Xiao, Jun); Huang, T (Huang, Tao)

Abstract: To investigate the efficacy of insulin sensitizer on prostatic tissue in animal model with benign prostatic hyperplasia (BPH) secondary to metabolic syndrome (MetS). Models were established by providing Sprague-Dawley rats with high fat diet (HFD) combined with metformin or not. All objects were killed 40 days later with prostatic tissue being removed, weighed before stained, as well as the expression level of insulin-like growth factor I (IGF-1) and receptor (IGF-1R) being measured, and the level of insulin resistance (IR) has also been evaluated. Model has been successfully established. Level of prostatic hyperplasia and IR as well as IGF-1 and IGF-1R expressions in the blank and saline control subunits of HFD group was higher than that of normal diet group ($P < 0.05$). In the subunit of metformin, along with the suppression of IR, the level of prostatic hyperplasia and the expression of IGF-1 pathway have both decreased ($P < 0.05$). MetS can promote the growth of prostate during the formation of central obesity and IR. IGF-1 pathway may have an important role in the induction of BPH following IR. The application of metformin can suppress the expression of IGF-1 and IGF-1R, thus preventing the promotive effect of IR on prostate tissue in animal model of MetS.

Web of Science 核心合集概述

Web of Science 核心合集是世界领先的引文数据库。其中包含来自全球最有影响力的期刊（包括开放访问的期刊）以及会议录文献和书籍的论文记录。范围将取决于机构的订阅深度。如需 Web of Science 核心合集所涵盖期刊的完整列表，请查阅[主期刊列表](#)。

索引

Web of Science 核心合集有 10 个索引，内容包含来自数以千计的学术期刊、书籍、丛书、会议的信息。

Journal Citation Indexes

Science Citation Index Expanded™

Science Citation Index Expanded 是针对科学期刊文献的多学科索引。It includes all cited references captured from indexed articles.

出版年: 1900 年至今

Some disciplines covered include:

Agriculture

天文学

Biochemistry

Biology

Biotechnology

Chemistry

计算机科学

神经科学

Oncology

Pediatrics

Pharmacology

Physics

植物学
